During a slot machine game, game effects are also displayed on a liquid crystal panel provided in a reel display window unit 39, and thus the liquid crystal panel 39d serves as a new machine component for performing game effects. Therefore, new effects for the game can performed on the liquid crystal panel 39d, which maintaining the novelty of facilitates effects. Furthermore, the diffusion sheet 39f and the light guiding plate 39g are formed openings 5a, 6a and 7a and openings 5b, 6b and 7b respectively for allowing the symbols variably displayed on the reels to be observed. As result, there are decreased obstacles, interposed, in such a way as to prevent the light from passing through, between the transparent acryl plate 39a and the reels 2-4 on which the light is variably Therefore, the visibility of displayed. symbols variably displayed on the reels 2-4 is increased.
